My name is
Fane Li Li
and I am studying typography & layout.

I was born in Colombia. I am 21 years old. I speak three language which are Spanish, Chinese and English. I have been living in the United States for five years. There are six people in my family my father and mother and my three siblings. I am the oldest sister in my family. I live with my family in Brooklyn, New York. I am a student at BMCC. My major is Multimedia Programming. I choose this major beacuse I like everything that envolve design and technology. I like page design, app design, poster design, etc. I like how designers make a theme and express something in a way that when viewers see the design they understand what they try to say just using certain words and images. I like to hangout with my friends and family. I hope in the future I make good work with design.
